
Iroha docs Documentation

Release develop

Sep 30, 2017

Contents

1	Developer's guide	3
1.1	Table of Contents	3
2	Tutorial	5

This site covers Iroha's usage & API documentation. For basic info on what Iroha is, please see [the main project website](#).

For new users, and/or for an overview of Iroha's basic functionality, please see the `_devGuide`. The rest of the documentation will assume you're at least passingly familiar with the material contained within.

Table of Contents

Consensus events

This site covers Iroha's usage & API documentation. For basic info on what Iroha is, please see [the main project website](#).

Transactions

Though binary support is planned in the future, all transactions in Iroha are currently serialized as JSON.

Message transactions

```
{
  "command" : "message",
  "message" : "[arbitrary string]",
  "publicKey" : "[base64 public key]",
  "signature" : "[base64 signature]",
  "version" : "[optional]"
}
```

Membership

Trust system (Hijiri)

CHAPTER 2

Tutorial

For new users, and/or for an overview of Iroha's basic functionality, please see the tutorial. The rest of the documentation will assume you're at least passingly familiar with the material contained within.
